

Gallatin County Rural Fire Protection Operating Plan

June 1, 2011

Overview

The intent of this document is to provide clear understanding of roles and responsibilities in regard to Montana Code Annotated 7-33, Part 22 and the Montana Department of Natural Resources and Conservation's Cooperative Fire Control Program within Gallatin County.

The Gallatin County Rural Fire Program has the following primary functions:

- Manage and coordinate wildfire suppression in unprotected portions of Gallatin County (outside of organized fire protection agencies and federal or state land management agencies).
- Coordinate wildfire suppression activities among fire protection agencies in Gallatin County, and adjacent jurisdictions.
- Maintain county's participation in the DNRC Co-op Program.
- Coordinate wildfire training within Gallatin County in support of the DNRC Co-op Agreement.
- Provide representation for the Gallatin County Commission on wildfire related issues.
- Coordinate placement and support of County Apparatus and Co-op Engines.
- Manage the Gallatin County Burn Permit System and established fire season.
- Coordinate activity restrictions due to fire hazard.
- Administer the Gallatin County Rural Fire Program and Fire Control Fund Budgets.

Definitions

MCA 7-33-22	Rural Fire Protection. Part 22 defined the county's responsibility for suppression of wildfires in unprotected areas, defines county rural fire chief, authorizes burn permits & fire restrictions, and defines cost recuperation from the state.
Cooperative Fire Control Program	The Cooperative Fire Control Agreement exists between Gallatin County and MT DNRC and satisfies the requirements of MCA 7-33-2210. Enrollment in the Co-op Program provides access to DNRC programs and establishes commitments on the County's side.
Participating Agency	A fire protection agency in Gallatin County who has in their possession (assigned to them) either a Gallatin County Engine, or a DNRC Co-op Engine assigned to Gallatin County.
County Apparatus	An apparatus (engine or support unit) owned and supported by Gallatin County Rural Fire.
Gallatin County Rural Fire	The department within Gallatin County assigned the responsibility for administering this plan.
Co-op Engine	An engine owned by MT DNRC that is assigned to Gallatin County and has been issued to a specific agency.
County Rural Fire Chief	The individual responsible for fulfilling the requirements outlined in MCA 7-33-22 for rural fire protection in suppression of wildland fires on unprotected lands.

County Fire Warden	A position defined and required by Gallatin County's Cooperative Fire Control Agreement with DNRC. Primary function is coordination with DNRC in support of the Cooperative Fire Control Agreement.
DNRC Fire Warden	A position defined in MCA 76-13-116 which DNRC appoints to act as their agent.
Fire Warden	Term is synonymous with County Rural Fire Chief in Gallatin County. Responsible for administration of the Gallatin County Rural Fire Department and its roles and responsibilities. In Gallatin County the Rural Fire Chief and County Fire Warden are combined.
Deputy Fire Warden	An individual who has authority delegated to him/ her to act on behalf of the Fire Warden.
Affidavit Lands	Privately owned land in which the owner has voluntarily opted to pay taxes for wildfire protection from DNRC.
Wildland Fire Protection District	A district created for protection of land classified as "forest land" from wildfire in which a tax is collected for protection from DNRC.

Land Classifications

In regard to wildland fire response, land in Gallatin County falls into several categories for protection. Each type of protection is provided through different methods and agencies. In some cases concurrent coverage may exist.

Fire Protection Agency

The majority of privately owned land in the populated areas of the county is within the boundaries of an organized fire protection agency (rural fire district [MCA 7-33-21], fire service area [MCA 7-33-24], or municipal fire department [MCA 7-33-41]) in which taxes or fees are collected for services. These agencies are responsible for wildfire suppression as well as other services. Most of these agencies have exclusive jurisdiction; however in some cases, rural fire districts overlap state and federal protection, creating concurrent protection responsibilities.

Forest Lands

Privately owned forest land in much of Gallatin County is also in a wildland fire protection district (MCA 76-13-2). Wildland fire protection districts are created by the Montana Department of Natural Resources and Conservation with a vote of the affected land owners. Property within an established wildland fire protection district is mandatorily assessed for wildfire protection from DNRC. In some cases property within a wildland fire protection district is also within a rural fire district or fire service area, resulting in concurrent coverage.

Landowners of forest land not in a wildland fire protection district may choose to have their land assessed for protection from wildland fire by the DNRC (MCA 76-13-212). This land is known as affidavit land.

All land in Gallatin County in a wildland fire protection district, state land, or assessed affidavit land is protected on the DNRC's behalf by the USDA Forest Service. This is conducted by an agreement known as a protection offset in which the Forest Service protects the land in Gallatin County on DNRC's behalf and DNRC protects Forest Service land on their behalf in another area of the state. As part of this agreement, the Forest Service is responsible for wildfire suppression activities and expenses on this land. The

DNRC still retains administrative control of this land. Large amounts of this offset protection exists in the Bridgers, Bangtails, Northern Gallatin Range, Big Sky, and West Yellowstone. Most land north of West Yellowstone is in a wildland fire protection district.

Federal Lands

All federal lands in Gallatin County are under wildfire protection from their respective land management agency. This primarily consists of the Gallatin National Forest (16 U.S.C. §§ 551, 1600 *et seq* and 7 U.S.C. § 1010-11), with Yellowstone National Park (16 U.S.C. § 1-4) having protection on the Southeast side of Gallatin County.

Unprotected Lands

Gallatin County is responsible for suppression of wildfires on private lands not falling into any of the categories listed above (MCA 7-33-22). Most of this area is contained in the Northern half of the county.

County Apparatus

County Apparatus consists of all Gallatin County owned equipment such as engines, support vehicles, trailers, and assorted equipment. Some of this equipment will be assigned to participating agencies for their use with the understanding that in return they will assist with wildfire in the unprotected areas.

Usage

County Apparatus that has been assigned to participating agencies is at the full disposal of the agency and may be utilized for incidents outside of wildfires in unprotected areas. The expectation is that when Gallatin County Rural Fire has a wildfire occur in an unprotected area, that participating agencies will respond within their ability.

Maintenance

County Apparatus is owned by Gallatin County and, as such, the County will support the maintenance of that equipment. Participating agencies are responsible for performing routine vehicle checks of apparatus assigned to them. Participating agencies are also responsible for routine fuel costs as they are utilizing the apparatus for their needs.

Routine maintenance, such as oil changes, should be incorporated into the participating agency's normal process used for their own equipment. The costs incurred for the maintenance of County Apparatus should be forwarded to the Fire Warden for reimbursement. It is expected that actual costs for the maintenance supplies will be submitted. For example, cost of oil used, cost billed by oil change facility, cost of air filters, etc... Personnel costs incurred for man hours spent on activities related to County Apparatus are not reimbursable. This is viewed as part of the participating agency's contribution in exchange for the use of the County Apparatus for their own uses.

Major repairs, or anything in question, must be coordinated with the Fire Warden.

Insurance

Insurance for these vehicles is carried by Gallatin County. Personnel responding on these apparatus are considered to be responding as mutual aid and are covered by their agency's insurance.

Personnel Qualifications

By accepting assignment of a County Apparatus, the participating agency is agreeing that the personnel that will be operating that apparatus are properly trained and qualified for their position in accordance with recognized standards and laws.

Outfitting

County Apparatus are outfitted with a standard complement of equipment when assigned to the participating agency. The participating agency can add or remove equipment to meet an apparatus configuration that meets their needs. When a County Apparatus is turned back in from a participating agency to the county, that apparatus must be equipped identically to how it was issued.

County engines will be outfitted, as a minimum, according to the current Northern Rockies Supplement to Chapter 20 of the Interagency Incident Business Management Handbook.

2011 IIBMH Minimum Standards for Engines

Components	MINIMUM STANDARDS FOR TYPE						
	1	2	3	4	5	6	7
Tank Minimum capacity (gal)	300	300	500	750	400	150	50
Pump minimum flow (gpm)	1000	500	150*	50	50	50	10
"@ rated pressure	150	150	250	100	100	100	100
Hose 2 1/2"	1200	1000					
1 1/2"	500	500	1000	300	300	300	
1"			500	300	300	300	200
Ladder (feet)	**48'	**48'

Pump and roll			YES	YES	YES	YES	YES
Max GVWR (lbs)					26,000	19,500	14,000
Personnel (min)	4	3	3	2	2	2	2

**Taken from 2011 IIBMH NR Supplement.*

2011 IIBMH Minimum Complements for Engines

2 nozzles, combination fog/straight stream, 1" NPSH female
2 nozzles, combination fog/straight stream, 1 1/2 " NPSH female
20 feet minimum suction hose with strainer or screened foot valve
2 shovels, size 0
2 pulaskis
1 spanner wrench, combination 1" to 1-1/2"
2 gated wyes, 1-1/2" NH threads
4 reducers, 1-1/2" NH female to 1" NPSH male
2 adapters, 1-1/2" NH female to 1-1/2" NPSH male
2 adapters, 1-1/2" NPSH female to 1-1/2" NH male
2 increasers, 1" NPSH female to 1-1/2" NH male
2 adapters, 1/4 turn to 1 inch NPSH (1 female/ 1 male)
1 double male, 1" NPSH threads
1 double female, 1" NPSH threads
1 double male, 1-1/2" NH threads
1 double female, 1-1/2" NH threads
1 forestry hose clamp (1 1/2")
1 ea. Required - 5 gallon container for drinking water
1 ea. Required - first aid kit (five person)
1 ea. Required - set of three (3) reflectors
1 ea. Required - fire extinguisher (5BC or better)
1 ea. Set required - wheel chocks (meet industry standard)
5-gallon min. fuel to operate pump and engine for 12 hours
1 ea. Required pump for water fill or have drafting capabilities
Tire Tread Depth equal to or better than 4/32" on steer axle and 2/32" on remaining tires
300 feet of 3/4-inch synthetic garden hose - 50 foot sections
1 reducer, 1 inch NPSH to 3/4-inch GH
2 adjustable nozzles 3/4 inch
1 mop up wand with 3/4-inch receptor for hose
1 gated wye, 3/4 inch
5 inline ball valves, 3/4 inch

**Taken from 2011 IIBMH NR Supplement.*

Co-op Engine

Co-op engines are owned by the State of Montana and are issued to Gallatin County for assignment among fire agencies in the county. The Gallatin County Fire Warden will distribute these engines to participating agencies throughout the county.

Usage

Co-op engines that have been assigned to participating agencies are at the full disposal of the agency and may be utilized for incidents outside of wildfires in unprotected areas. The expectation is that when Gallatin County Rural Fire has a wildfire occur in an unprotected area, that participating agencies will respond within their ability.

Maintenance

Co-op engines are owned by the State of Montana and, as such, the State will support the maintenance of that equipment. Participating agencies are responsible for performing routine vehicle checks of apparatus assigned to them. Participating agencies are also responsible for routine fuel costs as they are utilizing the apparatus for their needs.

Routine maintenance, such as oil changes, should be incorporated into the participating agency's normal process used for their own equipment. The costs incurred for the maintenance of co-op engines should be forwarded to the Fire Warden for reimbursement. Gallatin County will cover routine maintenance items. It is expected that actual costs for the maintenance supplies will be submitted. For example, cost of oil used, cost billed by oil change facility, cost of air filters, etc... Personnel costs incurred for man hours spent on activities related to co-op engines are not reimbursable. This is viewed as part of the participating agency's contribution in exchange for the use of the co-op engine for their own uses.

Major repairs, or anything in question, must be coordinated with the Fire Warden. The Fire Warden will coordinate with the MT DNRC on how they want to handle the repair. In most situations, DNRC's in house mechanics will make the repair.

Insurance

Insurance for co-op engines is covered by the Montana Department of Natural Resources and Conservation through the Cooperative Fire Control Agreement with Gallatin County. Personnel responding on these apparatus are considered to be responding as mutual aid and are covered by their agency's insurance.

Personnel Qualifications

By accepting assignment of a co-op engine, the participating agency is agreeing that the personnel that will be operating the engine are properly trained and qualified for their position in accordance with recognized standards and laws.

Outfitting

Co-op engines are outfitted with a standard complement of equipment when assigned to the participating agency. The participating agency can add or remove equipment to meet an apparatus configuration that meets their needs. When a co-op engine is turned back in from a participating agency to the county, that apparatus must be equipped identically to how it was issued.

DNRC Co-op engines will be outfitted, as a minimum, according to the Northern Rockies Supplement to Chapter 20 of the Interagency Incident Business Management Handbook. See County Apparatus Section for detailed listing.

County Assist

A County Assist is a process in which a participating county (of which Gallatin County is) can request assistance from the Montana Department of Natural Resources and Conservation for a wildfire that has exceeded the county's capability to manage. This is not a statutory program, but an internal process within DNRC. A key factor in this process is determining if the county is fully committed to the incident. Level of commitment is not a set level, but an agreed upon level between the county and the DNRC Line Officer. This is often measured by the county's financial and resource commitment to the incident.

When this situation occurs, a request is made to the DNRC by Gallatin County for a county assist outlining what our needs are. This then enables the DNRC to deploy resources and financial assistance to the incident. A county assist requires a formal request to DNRC from the Gallatin County Commission within 48 hours. Specific information on the county assist process is contained in the Annex F of the Gallatin County Emergency Management Plan.

Mutual Aid

Gallatin County Rural Fire is a signatory to the Gallatin County Mutual Aid Agreement, and is allowed by state statute to request mutual aid without a formal agreement. In accordance with this, Gallatin County Rural Fire may request assistance from agencies for non County Apparatus and co-op engines for use in suppression of wildfires in unprotected areas. Gallatin County Rural Fire resources are also available upon request for mutual aid in support of other agency's incidents.

Agencies in Gallatin County wishing to utilize Gallatin County Rural Fire resources through mutual aid must include these resources (through the agency hosting the resource) in their deployment plan through 911. Resources can always be requested on a resource by resource basis through a deputy fire warden, however it is preferable to automate this through 911.

A common mutual aid partner with Gallatin County is the Montana Department of Natural Resources (usually aviation resources). Mutual Aid can be requested and granted by DNRC without the need of meeting the requirements of a county assist.

Gallatin County is a signatory of the South Central Zone Operating Plan between Gallatin and Park Counties, Gallatin National Forest, Yellowstone National Park, and Montana DNRC. This agreement gives the county access to federal wildfire resources in the area and the region.

Fire Warden

The Gallatin County Fire Warden is appointed by name by the Gallatin County Commission. The Fire Warden is responsible for carrying out the duties outlined in this plan that consist of the County Rural Fire Chief functions as outlined in the Montana Code Annotated and the County Fire Warden functions as outlined in the Montana DNRC Cooperative Fire Control Agreement. For simplicity, the term County Fire Warden is used in this plan to refer to the County Fire Warden and the County Rural Fire Chief.

The Fire Warden is authorized to represent Gallatin County as their Line Officer on matters within the scope of this plan. The Fire Warden may appoint deputy fire wardens and delegate authority to them as the Fire Warden sees fit.

Deputy Fire Wardens

Deputy fire wardens are agents of Gallatin County Rural Fire who have had specific authorities delegated to them. The deputy fire wardens will primarily serve as representatives of the county at meetings or training, serve in leadership positions at wildfires in unprotected areas, or provide support to county apparatus and co-op engines.

Deputy fire wardens are identified by the Gallatin County Fire Warden (with delegated authority for the Gallatin County Commission) and provided delegated authority to fulfill the duties outlined by this plan. Usually the deputy fire wardens are identified ahead of time, however certain situations may necessitate temporary instatement as a deputy fire warden by the Gallatin County Fire Warden.

When functioning as a deputy fire warden, personnel are hired as temporary employees of Gallatin County. This provides necessary insurance coverage for the deputy fire wardens as well as providing compensation for the additional responsibilities they have assumed.

Vehicles utilized by deputy fire wardens will be paid for at the current Interagency Incident Business Handbook rate to the vehicle's owner.

Fire Control Ordinance

The County Fire Warden is responsible for administration of the Gallatin County Burn Permit System in accordance with Ordinance 1999-01. Each fire protection agency in Gallatin County is responsible for enforcement and approval of burning in their district.

Gallatin County has contracted with Montana Interactive to provide an online burn permit system located at burnpermits.mt.gov. This system allows individuals to purchase and activate burn permits themselves (permits may also be purchased in person at several locations in the county). Authorized users are capable of viewing current burn activity as well as shutting down burning. While burning may be shut down on a fire protection agency basis, it is strongly suggested that agencies in adjacent geographic areas act in unison to avoid confusion with the public. Complete county wide closures on burning may be enacted through resolution by the Gallatin County Commission.

When a county wide fire closure is deemed necessary by a fire chief in Gallatin County, a request to the fire warden will be made to coordinate the request. The fire warden, or designee, will facilitate a conference call between all available fire chiefs to discuss the request. If the consensus of the participating fire chiefs is to close burning, the fire warden, or designee, will request the county commission close burning by resolution.

Burn permit fees are collected in the Fire Control Fund for two purposes. First, all costs of operating the system are covered out of this fund. Second, remaining money is utilized to fund fire training in Gallatin County.

Agencies selling burn permits in person are entitled to collect 60% of the burn permit cost as a processing fee. The other 40% will be submitted to the Gallatin County Treasurer for deposit into the Fire Control Fund. Burn permits sold online have 100% of the cost deposited into the Fire Control Fund.

Training Funds

Funding in the Fire Control Fund beyond what is needed to run the program will be utilized to support training for fire departments in Gallatin County. The training funds will primarily be used to help support bringing training classes into the county and to pay tuition for firefighters to attend classes. Agencies wishing to utilize these funds must submit a request in writing to the Gallatin County Fire Warden that outlines what training opportunity, who will be attending, and the cost.

Approved training must be fronted by the individual or their agency. Upon completion of the training, proof of attendance and a payable form (invoice, claim voucher, etc...) must be submitted to the Fire Warden. Gallatin County will then reimburse the costs by check.

Volunteer Firefighter Insurance

Gallatin County maintains insurance for firefighters in the county as part of the county's contribution to this program. Medical benefits are provided in excess of Worker's Compensation for active firefighters in the county.

Accidental Death and Dismemberment Catastrophic Loss Benefit	Principal Sum: \$25,000.00
Accidental Medical Expense Benefit	Maximum Benefit Amount: \$10,000.00 Deductible Amount: \$0.00
Heart or Circulatory Malfunction Benefit (death)	Principal Sum: \$25,000.00
Accelerated Benefit (Living Benefit)	Maximum Benefit Amount: \$12,500.00

Hartford Life Policy# 41-VP-240577

Incident Deployment

Gallatin County Rural Fire responds to incidents in unprotected areas utilizing a combination of Gallatin County resources, DNRC co-op engines, and mutual aid resources. The deployment of resources has been established to make efficient use of the resources in the county.

Deputy Fire Wardens

Deputy Fire Wardens are automatically dispatched on all 0 Alarms. Deputy Fire Wardens will coordinate among themselves on who is the closest to the incident and available. Once a deputy fire warden is committed to responding as the primary deputy fire warden for the incident, they will notify the Emergency Communications Center that they are responding in this capacity and request a page be sent to county fire identifying who the fire warden is handling the incident.

Incident Accountability

The County Rural Fire deployment plan is designed to provide management personnel from the closest fire agencies as well as deputy fire wardens for incidents. The intent for wildfires in the unprotected areas is to have the first arriving management personnel establish and assume incident command (IC) of the incident. If the first arriving IC is not a deputy fire warden, it is expected that the IC will continue to manage the incident until a deputy fire warden can get to the scene to assume command. This is to ensure efficient coordination of resources and the safety of both responders and the public.

Incident Expenses

Costs incurred by agencies responding to a Gallatin County Rural Fire incident will be covered in accordance with the Gallatin County Mutual Aid Agreement. Typically costs (personnel, equipment rates, etc...) during the initial operational period will be considered mutual aid. Operations after the first operational period are eligible for reimbursement from the county. In accordance with the Gallatin County Emergency Management Plan and the Gallatin County Mutual Aid Agreement, rates will be based on the Interagency Incident Business Handbook (a.k.a. DNRC Rates) using the Northern Rockies supplements. Agencies requesting reimbursement for paid employees will be reimbursed at each employee's expended rate including benefits. County apparatus and co-op engines are not eligible for reimbursement for the equipment, but the personnel are.

Damages that occur at any point in the incident will be reimbursed (for non county or state resources) in accordance with the Gallatin County Mutual Aid Agreement. During the first operational period while under mutual aid (not in a pay status), Gallatin County will

reimburse up to \$1000 per agency per incident for incident caused damage (this may be superseded by other agreements). Any damage incurred on an incident should be reported to, and coordinated with, the Gallatin County Fire Warden.

Fuel and reasonable welfare items for resources responding to a Gallatin County Rural Fire incidents will be provided (all types of resources).

Agencies may choose not to be reimbursed for any of the items listed in this section.

Response Plan Areas

Spanish Creek	North of Spanish Peaks area of Gallatin National Forest, South of Axtell Anceney Road, East of Madison County Line (Beaverhead-Deerlodge National Forest), West of US 191. Basically the West side of the Flying D Ranch North to Axtell Anceney Road.
Norris	North of Madison County Line, South of Three Forks and Willow Creek Fire Districts, East of Madison County Line, West of MM 17.5 on Norris Road. Basically North of Norris Road along the Madison River.
Horseshoe	North of Gallatin River, South of Broadwater County, East of Missouri River, West of Horseshoe Hills. Basically the areas accessed through Clarkston, Horseshoe Cottonwood Road, etc...
Maudlow	North of Gallatin River and Central Valley Fire District, South of Broadwater County, East of Horseshoe Hills, West of Bridger Range of Gallatin National Forest. Basically the area accessed from Dry Creek Road and assorted spurs.
Sedan	North of Sedan Fire District, South of Meagher County Line, East of Gallatin National Forest, West of Park County Line. Basically the area North of Sedan along the East end of 16 Mile.
Bozeman	Islands of unprotected within the City of Bozeman. Primarily off of Griffin and Bridger Drives.

Agreement of Participation

As a signatory to this version of the *Gallatin County Rural Fire Protection Operating Plan*, _____ is certifying that it agrees to the conditions and responsibilities outlined in this plan. Participating Agencies that have Gallatin County or DNRC resources assigned to them are agreeing to the respective responsibilities for the Participating Agencies and Gallatin County as outlined in this plan.

6 months notice must be given to Gallatin County by a Participating Agency that no longer wishes to participate in this program, and return assigned resources. If Gallatin County chooses to reallocate assigned resources, 6 months notice will be given to the Participating Agency. Changes in participation and resource allocation may be made sooner than 6 months if mutually agreed upon by both parties.
