Rank order priorities

Vickie distributed the goals & objectives identified at last meeting. Add “Evacuation Fatality Plan - BDH/community” to the end of the list (to be worked on no earlier than 2010). This is a plan to be developed by BDH in the event evacuation of the hospital is necessary. It will spell out where to go and if there are mass fatalities, where to put them.

Discussion on the goals and objectives included

- Urgent Care Involvement to be combined with Engagement/Involvement: Clinical Practices and Bozeman Deaconess Health Group
- UHC Formalization is seen as a behind the scenes activity
- Urgent cares/clinical practices/ alternative care sites? Alternative care sites are both to set up for mass care (see page 3 of minutes).
