**Re: November 6, 2018 diesel spill in violation of the Montana Solid Waste Management Act
[CVID 21003]**

To Whom It May Concern:

The Enforcement Program (ENF) of the Montana Department of Environmental Quality (DEQ) received information that an unknown amount of diesel fuel spilled to the environment due to a semi-truck accident on Highway 20 near Targee Pass in Gallatin County, Montana.

As of the date of this letter, ENF has not received the final spill cleanup report documentation to show the site was properly remediated. The December 3, 2018 letter that was sent to you required you to complete assessment, remedial actions, and submit a cleanup report by March 3, 2019. I have included a copy of the letter for your reference.

DEQ is preparing to issue an administrative order pursuant to Section 75-10-227, Montana Code Annotated, requiring you to complete the corrective actions requested in the violation letter. The order may also include the assessment of an administrative penalty. To avoid an administrative enforcement action, DEQ requests that you complete the assessment, remedial actions, and submit a final spill cleanup report to DEQ by May 19, 2019.

If you have questions related to this matter, please contact me at either jrasmann2@mt.gov or the telephone number listed below.

Sincerely,

A handwritten signature in blue ink that reads "John Rasmann".
