**RE: Spill Closure Approval [CVID #18511]**

To Whom It May Concern:

On June 23, 2015, the Enforcement Division (ENFD) of the Montana Department of Environmental Quality (DEQ) received a report that 25 gallons of diesel spilled from an accident involving a refrigerator unit on a pup trailer along Interstate 90, near mile marker 289, Gallatin County, Montana.

On July 23, 2015, a cleanup report was received from Olympus Technical Services that outlined the cleanup activities. Contaminated materials were placed into a 55-gallon drum and then disposed of at the Valley View Landfill in East Helena.

Based upon the information provided, ENFD has determined the assessment and cleanup to be satisfactory and is closing the spill at this time. However, ENFD reserves the right to request that additional activities be conducted should information become available to warrant it. If you have any questions, please contact me at the telephone number listed below.

Sincerely,

A handwritten signature in cursive script that reads "Shasta Steinweden".
